Enno Boland [@Gottox](#) | 32c3

# HISTORY

Started in 2008 as a testbed for package management.  
Juan RP is the founder and project leader.

# WHAT'S VOID LINUX?

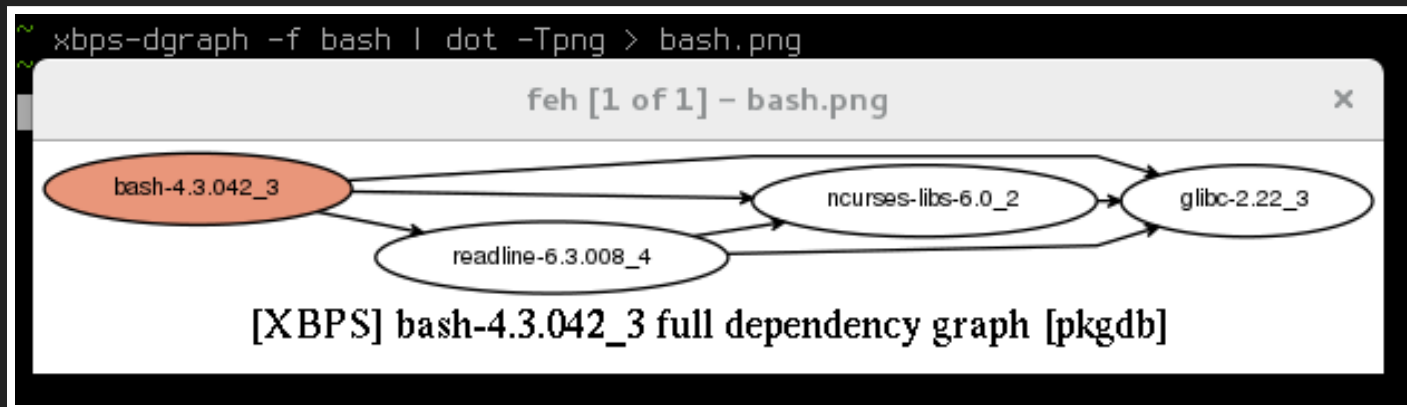

- Linux Distribution
- Rolling Release
- libressl, runit, xbps

# XBPS

- package manager from scratch
- signed packages
- tool to generate dependency graphs (see `xbps-dgraph`)

# XBPS-DGRAPH

```
xbps-dgraph -f bash | dot -Tpng > bash.png
```

# WHAT'S VOID LINUX? (DEVS)

- Github oriented
- Continuous Integration (buildbot, travis)

# WHY USE VOID LINUX

- fast development
- quick updates
- easy to get involved

# THE LAST TALK...

# THE LAST TALK...

Today?

# AND OTHER USES?

- Arch?

# AND OTHER USES?

- Debian? Ubuntu?

# AND OTHER USES?

- Mac?

# THE LAST YEAR

```
# git log --since='one year ago' --oneline | wc -l  
15461
```

```
# sh ./count_packages.sh
x86_64: 6233
x86_64-musl: 5517
i686: 6215
armv6l: 5038
armv6l-musl: 4428
armv7l: 5071
armv7l-musl: 4437
```

— \ | Cross compiled  
|  
— /

Last year: 4500 packages / 3300 cross compiled

# CONCLUSION

- new kid on the block
- awesome build system
- lot of stuff happened in the last year
